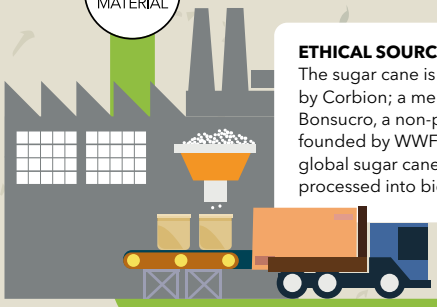
SUGAR CANE
Our PLA is made from certified cultivation - sugar cane. It is not genetically modified.

BIO MATERIAL

ETHICAL SOURCING
The sugar cane is processed into PLA by Corbion; a member of Sedex and Bonsucro, a non-profit organisation founded by WWF in 2005 that monitors global sugar cane production. It is then processed into bioplastic granules.



DID YOU KNOW?
Sugar cane is very efficient; compared with maize, sugar cane produces double the amount of raw material per area and less water is required.

GREEN ELECTRICITY
senator® is an ISO 14001 certified company, manufacturing with green electricity in the heart of Europe. Our state of the art equipment is powered by the River Main in Germany. Thus, the eco-friendliness of our bio pens is incomparable.
